A Legacy Worth Protecting A Business Worth Professionalizing

A family business is more than an enterprise. It represents years of relationships, reputation, and accumulated wealth. But the systems that worked for one generation may not suffice when the business grows larger or more complex.

Legacy

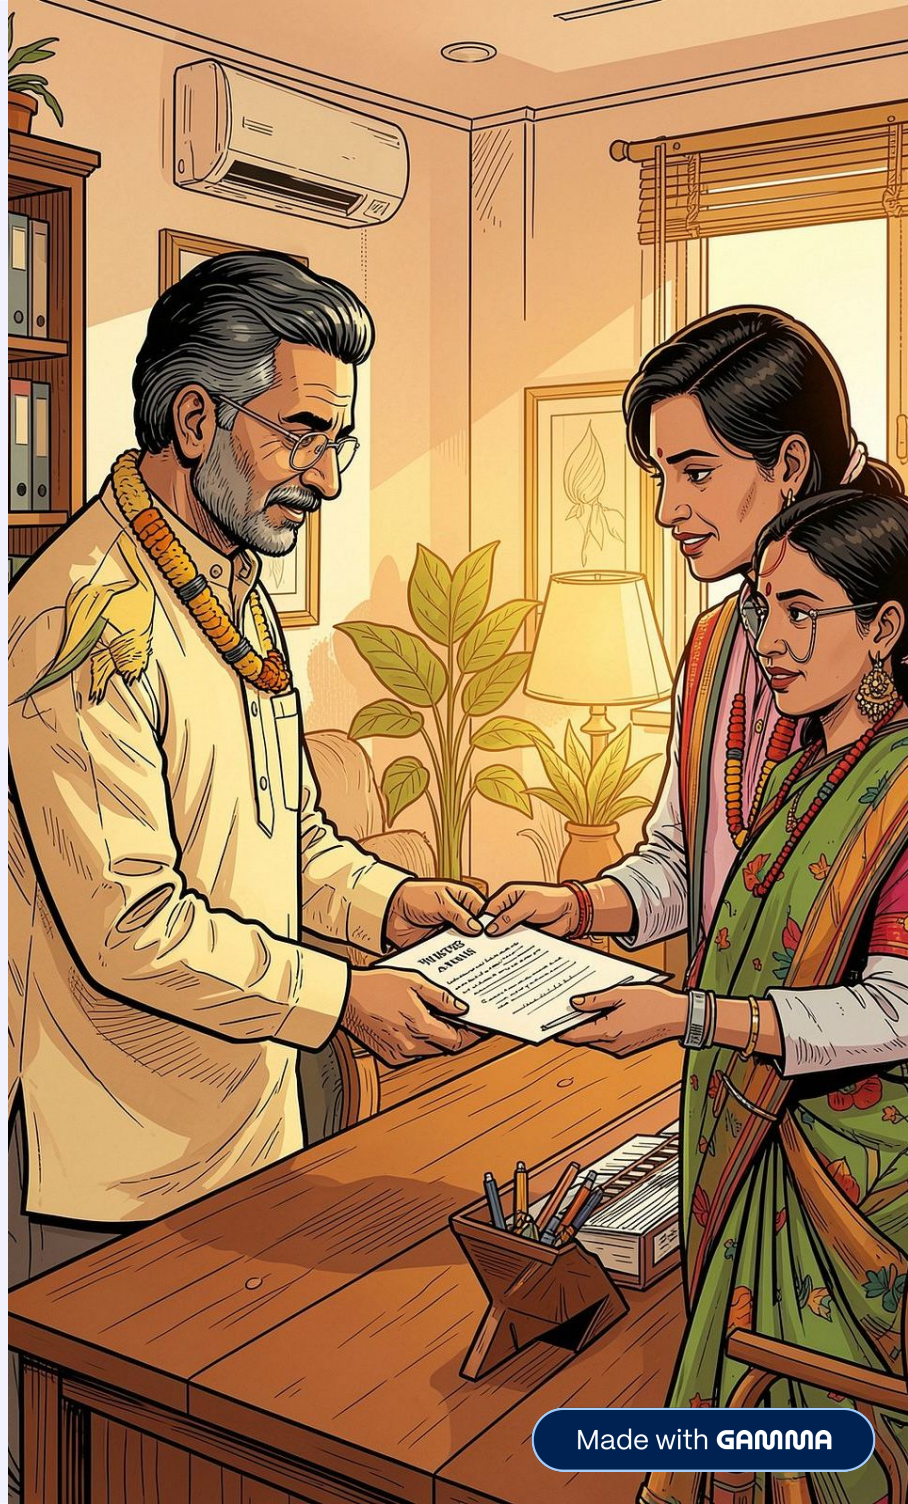
Years of relationships, trust, and family values

Complexity

Growth across generations introduces governance, role, and succession challenges

Professionalization

Structured systems that respect legacy while enabling scalability



Made with GAMMA

Common Challenges Family Businesses Face

As businesses grow across generations, informal systems create risks around roles, succession, and governance.

Role Ambiguity

Family and management responsibilities overlap without clear accountability.

Founder Dependency

Critical decisions rely heavily on one person, creating operational risk.

Delayed Succession

Leadership transitions are informal or postponed until urgency forces action.

Governance Gaps

Business growth outpaces governance, creating transparency and continuity risks.

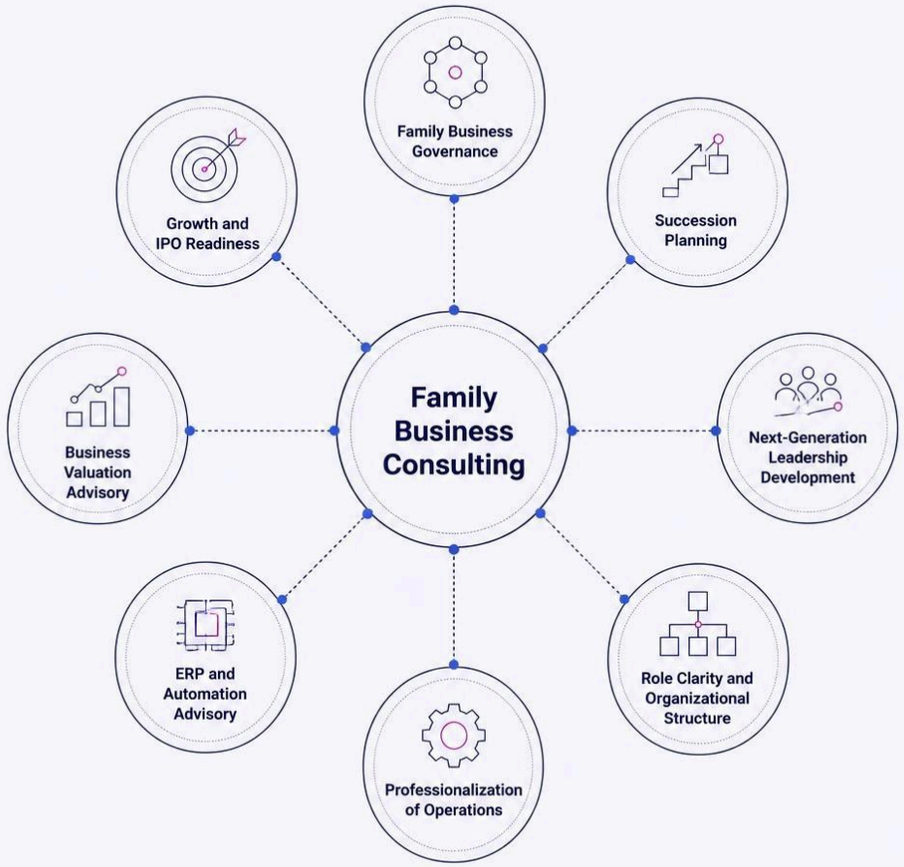
Our Family Business Consulting Services

C&B's family business advisory covers governance, succession, professionalization, and growth.



Each service is tailored to the family's values, business stage, and long-term goals. C&B combines **management consulting**, **corporate finance**, and **valuation** capabilities to deliver practical change.

Our advisory is implementation-focused — we work alongside your organization to put recommendations into practice.

Governance & Succession Planning

Strong governance and succession planning protect continuity and preserve the family's legacy.

Family Business Governance

Define decision-making structures, accountability, and professional governance mechanisms that support transparency and continuity across generations.

Succession Planning

Support structured leadership and ownership transitions, preparing the next generation for responsibility before a transition becomes urgent.

Next-Generation Leadership

Help Gen 2 and Gen 3 members understand leadership expectations and transition from family member to business leader.

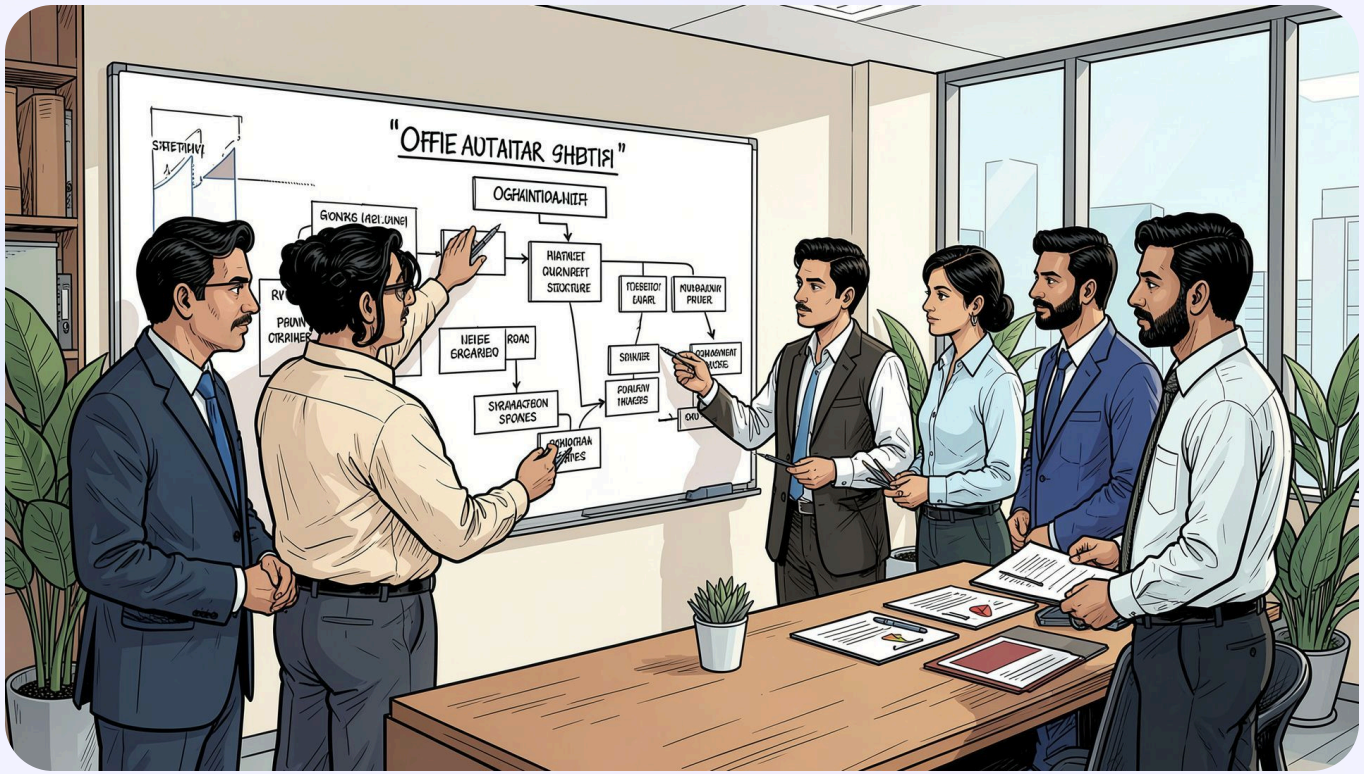
Professionalization & Organizational Structure



Role Clarity & Structure

Define responsibilities between family members, professional managers, and teams to reduce ambiguity and improve accountability.

Operational Excellence

Improve processes, efficiency, working capital, and inventory management so the business can scale with greater control.

ERP & Automation Advisory

Evaluate and optimize ERP and automation environments to improve operational accuracy, visibility, and decision-making.

Our 5-Step Advisory Approach

C&B's family business consulting follows a structured, implementation-focused methodology — from diagnosis to measurable outcomes.

1

01 — Assess

Understand the current family, management, financial, and operational structure.

2

02 — Align

Clarify business goals, family expectations, and stakeholder responsibilities.

3

03 — Design

Develop governance, organizational structures, KPIs, and reporting systems.

4

04 — Implement

Work alongside the organization to put recommendations into practice.

5

05 — Monitor

Track outcomes, identify gaps, and refine the operating model.

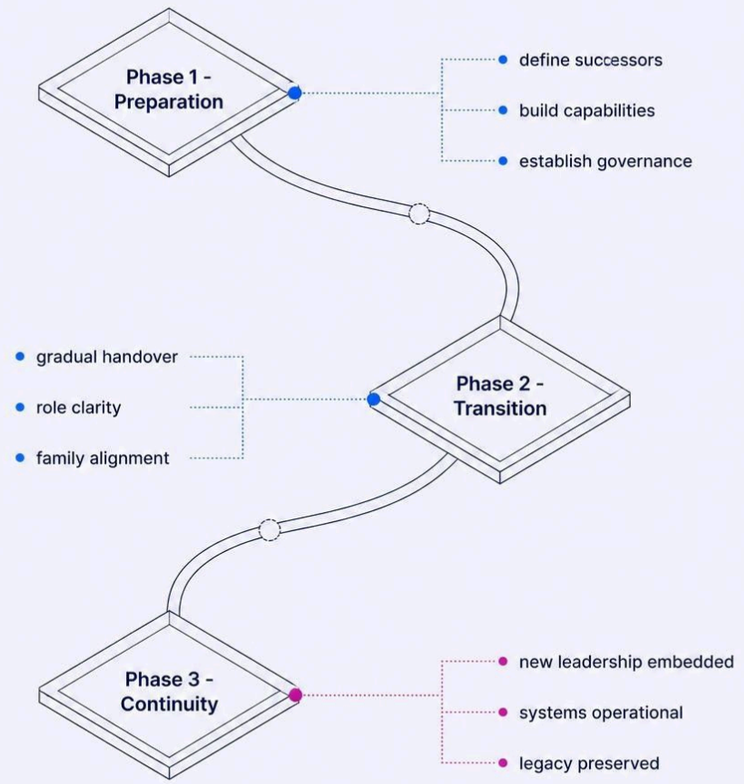
Why Succession Planning Matters

Succession involves leadership, ownership, governance, employee confidence, and business continuity — not simply a transfer of title. C&B's advisory creates a **planned transition that protects continuity while preserving the family's legacy.**



Leadership Readiness

Prepare next-generation leaders with clarity on roles and expectations.

Ownership Transition

Structure ownership changes with valuation and legal alignment.

Business Continuity

Ensure operations remain stable through and after the transition.
